

2017 IGCSE Courses Year 10

IGCSE subjects follow 2-year courses. The subjects that your child selects will begin in February 2018 and be examined in October/November 2019. English and Mathematics are compulsory subjects. Students are then required to select 6 further subjects. When choosing your subjects consider the following points.

- Only one subject may be selected from each of the groups A to F.
- It is important to select a broad balance of subjects.
- Students are encouraged to study at least one science subject (Biology, Chemistry, Environmental Management or Physics).
- Though Art and Graphics at Pinehurst are taught as distinctively different subjects and we allow students to select both if they wish, CIE restrictions only allow final IGCSE examinations to be taken in one of these subjects.

A	B	C	D	E	F
Design Technology	Biology	Art	Accounting	Art	Biology
Geography	Chemistry	Business Studies	Chemistry	Biology	Business Studies
Information Technology	Environmental Management	Chemistry	Graphics	Design Technology	Graphics
Physics	Music	Geography	History	Drama	Physics
Spanish	Physical Education	Mandarin	Information Technology	History	Spanish
		Physics		Physical Education	

Students will receive personalised login details along with the necessary instructions enabling them to confirm their decisions online. The deadline for completing on line course selection is 17th October.
